B. LAND USES:

Nurturing a vibrant and inclusive community

A fundamental element for any successful community is the provision of an appropriate mix of land uses. The Plan requires specific uses for certain blocks. The blocks adjacent to the transit stops are generally a mix of retail, residential, hotel and office, while other blocks are predominantly residential. An opportunity and a challenge for the Plan area is that it is surrounded by one of the largest concentrations of office use within the City (Figure 24, Table 1).

While the existing Mark Center office buildings provide an employment center for the City, the uses and buildings are segregated in a suburban office park, rather than integrated into each of the neighborhoods. In addition, the existing office buildings limit the market demand for new office within the redevelopment sites. It is essential that the Plan integrate the existing office uses within the Mark Center as part of the Plan.
